About

Senior Frontend Engineer with 8+ years of experience building scalable, high-performance web applications using Angular and React. Proven track record of delivering complex, data-heavy products, improving application architecture, and optimizing performance. Experienced in working across multiple frontend codebases in parallel, with a strong focus on clean architecture, reusable components, and code quality. Comfortable in remote environments and actively expanding into fullstack development.

Experience

MEV

Aug 2023

Senior Software Engineer

 <https://mev.com/>

As a contractor, worked with [Hawaii Information Service](#) company team on their MLS tool.

- Contributed to a production-grade MLS platform used by 1,000+ real estate agents to search, analyze, and manage property listings
- Delivered interactive map-based search using ArcGIS, improving property discovery and reducing search time for users
- Contributed to active development of both Angular and React applications in parallel, delivering features across two production codebases
- Built UI components and implemented feature logic in React using modern patterns (hooks, state management, Redux)
- Reduced technical debt by migrating Angular 14 → 18 within an NX monorepo, improving maintainability and release stability
- Implemented NgRx state management, reducing state-related bugs and improving data consistency across the application
- Built and maintained unit tests (Jasmine/Jest/Karma), increasing code reliability and reducing regressions
- Optimized performance of data-heavy views, improving responsiveness and user experience
- Automated CI/CD workflows with Docker & Jenkins, reducing manual deployment effort and improving release consistency
- Built reusable UI components (PrimeNG), accelerating feature development and improving consistency across the app
- Integrated mobile-ready builds using Capacitor, enabling hybrid deployment
- Actively contributed to architectural decisions, code reviews, and performance improvements across the project

Perfectial

Sep 2018 - July 2023

Software Engineer

 <https://perfectial.com/>

As a contractor, worked with **Clickatell** company team on two web-portals (admin and client portal) simultaneously, using Angular 8 and Angular 11.

- Developed complex, data-driven dashboards on the admin portal using Angular
- Implemented key frontend features on the client portal, including payments (Cybersource 3D Secure), transaction history, account settings, and subscriptions
- Reimplemented legacy functionality using modern frontend patterns, improving component architecture and maintainability
- Built reusable UI components and applied patterns transferable across Angular and React ecosystems
- Worked with data visualization tools, including Power BI integrations and configurable charts
- Collaborated on frontend architecture and code quality improvements using modern JavaScript frameworks (Angular, React)
- Upgraded the application from Angular 8 to Angular 11, reducing technical debt and improving application stability
- Onboarded and mentored new team members, improving team productivity and code quality

PozitiFF

Sep 2017 - Aug 2018

Front-end developer

 <https://www.pozitiff.cz/>

Developed the front-end of customers websites using HTML, CSS3, jQuery, Bootstrap
